

TitanForge Manufacturing Pvt. Ltd.

Operational Expense Report — January 2026

Report ID: OPS-2026-1001
Plant Location: Nagpur Industrial Zone
Prepared By: Operations Intelligence Division

Operational Metric	Value
Electricity Charges	■404123
Units Consumed	17044 kWh
Diesel Expense	■84398
Maintenance Expense	■93497
Production Units	15693
Machine Downtime	9 hours

Operational observation: Electricity expenditure increased relative to stable production output.

AI Recommendation: Review non-production-hour energy usage for abnormal consumption patterns.

Maintenance observation: Scheduled maintenance activities remained within acceptable operational thresholds.

Fuel usage remained stable despite moderate increase in production volume.

Operational efficiency score improved marginally due to reduced downtime.

TitanForge Manufacturing Pvt. Ltd.

Operational Expense Report — February 2026

Report ID: OPS-2026-1002
Plant Location: Nagpur Industrial Zone
Prepared By: Operations Intelligence Division

Operational Metric	Value
Electricity Charges	■379297
Units Consumed	16561 kWh
Diesel Expense	■93841
Maintenance Expense	■59071
Production Units	11283
Machine Downtime	8 hours

Operational observation: Electricity expenditure increased relative to stable production output.

AI Recommendation: Review non-production-hour energy usage for abnormal consumption patterns.

Maintenance observation: Scheduled maintenance activities remained within acceptable operational thresholds.

Fuel usage remained stable despite moderate increase in production volume.

Operational efficiency score improved marginally due to reduced downtime.

TitanForge Manufacturing Pvt. Ltd.

Operational Expense Report — March 2026

Report ID: OPS-2026-1003
Plant Location: Nagpur Industrial Zone
Prepared By: Operations Intelligence Division

Operational Metric	Value
Electricity Charges	■352876
Units Consumed	23786 kWh
Diesel Expense	■49526
Maintenance Expense	■95921
Production Units	13004
Machine Downtime	6 hours

Operational observation: Electricity expenditure increased relative to stable production output.

AI Recommendation: Review non-production-hour energy usage for abnormal consumption patterns.

Maintenance observation: Scheduled maintenance activities remained within acceptable operational thresholds.

Fuel usage remained stable despite moderate increase in production volume.

Operational efficiency score improved marginally due to reduced downtime.

TitanForge Manufacturing Pvt. Ltd.

Operational Expense Report — April 2026

Report ID: OPS-2026-1004
Plant Location: Nagpur Industrial Zone
Prepared By: Operations Intelligence Division

Operational Metric	Value
Electricity Charges	■291140
Units Consumed	16970 kWh
Diesel Expense	■107723
Maintenance Expense	■103033
Production Units	10201
Machine Downtime	9 hours

Operational observation: Electricity expenditure increased relative to stable production output.

AI Recommendation: Review non-production-hour energy usage for abnormal consumption patterns.

Maintenance observation: Scheduled maintenance activities remained within acceptable operational thresholds.

Fuel usage remained stable despite moderate increase in production volume.

Operational efficiency score improved marginally due to reduced downtime.

TitanForge Manufacturing Pvt. Ltd.

Operational Expense Report — May 2026

Report ID: OPS-2026-1005
Plant Location: Nagpur Industrial Zone
Prepared By: Operations Intelligence Division

Operational Metric	Value
Electricity Charges	■414883
Units Consumed	14394 kWh
Diesel Expense	■74313
Maintenance Expense	■96161
Production Units	17905
Machine Downtime	10 hours

Operational observation: Electricity expenditure increased relative to stable production output.

AI Recommendation: Review non-production-hour energy usage for abnormal consumption patterns.

Maintenance observation: Scheduled maintenance activities remained within acceptable operational thresholds.

Fuel usage remained stable despite moderate increase in production volume.

Operational efficiency score improved marginally due to reduced downtime.
