

Manufacturing Operations Report - Page 1

Company Name: SteelCore Industries

Reporting Month: March 2026

Submission ID: OPS-2026-1001

Overall Similarity 11%

Electricity Charges: ■371233

Units Consumed: 11105 kWh

Machine Downtime: 8 hours

Internet Sources 13%

Publications 5%

Operational Notes: Energy utilization remained stable during this reporting cycle.

AI Recommendation: Optimize machine idle scheduling to reduce energy waste.

Manufacturing Operations Report - Page 2

Company Name: GreenGrid Energy Systems

Reporting Month: February 2026

Submission ID: OPS-2026-1002

Overall Similarity 21%

Electricity Charges: ■375202

Units Consumed: 23700 kWh

Machine Downtime: 5 hours

Internet Sources 9%

Publications 5%

Operational Notes: Energy utilization remained stable during this reporting cycle.

AI Recommendation: Optimize machine idle scheduling to reduce energy waste.

Manufacturing Operations Report - Page 3

Company Name: SteelCore Industries

Reporting Month: March 2026

Submission ID: OPS-2026-1003

Overall Similarity 17%

Electricity Charges: ■185305

Units Consumed: 20167 kWh

Machine Downtime: 8 hours

Internet Sources 10%

Publications 2%

Operational Notes: Energy utilization remained stable during this reporting cycle.

AI Recommendation: Optimize machine idle scheduling to reduce energy waste.

Manufacturing Operations Report - Page 4

Company Name: GreenGrid Energy Systems

Reporting Month: March 2026

Submission ID: OPS-2026-1004

Overall Similarity 11%

Electricity Charges: ■236491

Units Consumed: 17439 kWh

Machine Downtime: 5 hours

Internet Sources 12%

Publications 5%

Operational Notes: Energy utilization remained stable during this reporting cycle.

AI Recommendation: Optimize machine idle scheduling to reduce energy waste.

Manufacturing Operations Report - Page 5

Company Name: GreenGrid Energy Systems

Reporting Month: March 2026

Submission ID: OPS-2026-1005

Overall Similarity 18%

Electricity Charges: ■178778

Units Consumed: 24622 kWh

Machine Downtime: 1 hours

Internet Sources 13%

Publications 3%

Operational Notes: Energy utilization remained stable during this reporting cycle.

AI Recommendation: Optimize machine idle scheduling to reduce energy waste.
